ARCTIC BLUE GIN

ARCTIC BLUE BEVERAGES

”Experience the harmony of northern nature in a gin bottle”

Story

This is the moment. The aromatic, fleeting moment moment of morning haze, when the blueberry tufts and spruce needles sparkle with dew in the humid Finnish blueberry forest. We wanted to recreate that unique moment,its perfect harmony of aromas, and capture it in a bottle for the whole world to experience. This passionate idea gave birth to the Finnish Arctic Blue Gin. A winner of awards around the world, Arctic Blue Gin brings the unique nature experience of our homeland to your glass. Thanks to our special distillation method, all the most delicate aromas of wild blueberries,natural pectins and essential oils are preserved in Arctic Blue Gin. That’s why its colour changes to a beautiful haze in the glass,when cold tonic water is poured on top. A colour change resembling the mists of the blueberry forests of North Karelia tells,that the aromas of the natural ingredients have not been weakened by cold filtration, when the pectin in the blueberries reacts with the ice and tonic. This unique Finnish gin is hand-made in Ilomantsi, Finland.

Producer

It all started with a crazy, almost impossible vision. We wanted to capture Finland's uniquely pure nature in a bottle for the world to enjoy. This gave birth to the globally acclaimed Arctic Blue Gin, and the same unwavering ambition reflects in all artisanal beverages crafted under the Arctic Blue name. Quality is something we never compromise on. Our distillery is located in Ilomantsi, North Karelia.

COLOR Transparent

AROMA An aromatic mix of spruce needles and blueberry tufts

TASTE Juniper, blueberries, spruce forest and spiciness

TIPS FOR USE Arctic Blue Gin & Tonic. Garnish: 3 highbush blueberries Glass: Highball or lowball Preparation: Pour the ingredients over the ice and garnish the drink with highbush blueberries. Place the Arctic Blue Tonic bottle next to the drink.
